Please find below and/or attached an Office communication concerning this application or proceeding.

Commissioner for Patents

This is to inform applicant that the species election of compound 173 made in the response to election restriction on 02/12/10 is non-responsive. While applicant elected compound 173 as the species to be examined in Group I, the Examiner would like to point out that compound 173 which contains a carbocycle ring at position X is not encompassed by the generic formula I of claim 1. Attention is directed to the definition of X which requires X to be N-R3 wherein R3 is H, alkyl, optionally substituted alkyl or aryl or aryl C1-C6 alkyl or heterocyclyl or heterocyclyl C1-C6 alkyl. Since X cannot be a carbocyclyl ring, such election is considered to be non-responsive. Applicant is therefore required to elect a particular species of the general compound of formula I as disclosed in claim 1.

/SREENI PADMANABHAN/
Supervisory Patent Examiner, Art Unit 1627
